---

## Education

- 2013 – 2017 **Ph.D.**, *Ecology and Evolution*, University of Illinois at Chicago.  
Advisors: Joel Brown, Seth Magle, and Chris Whelan
- 2005 – 2009 **B.S.**, *Environmental Science*, Western Washington University.  
Advisor: David Wallin

---

## Professional Experience

- 2017 – Present **Quantitative Ecologist**, *Urban Wildlife Institute*, Lincoln Park Zoo, Chicago, IL.  
My research in this position is in biodiversity informatics. I create programmatic pipelines to pre-process and validate big ecological data sets, develop methods to harness the ecological information in such data, and build tools to effectively communicate big data results. I also closely collaborate with Conservation & Science staff at the Lincoln Park Zoo to better manage and analyze data from a wide variety of sources, from touchscreen cognition tests for primates to nation-wide camera trapping projects.
- 2014 – Present **Analytics Advisor**, *Urban Wildlife Information Network*.  
The Urban Wildlife Information Network (UWIN) is the world's first systematic multi-city urban wildlife monitoring network. To facilitate the collection and analysis of these data I worked closely with a tech company in Chicago to develop a web application and SQL database to store camera trapping images, identify species in images, and summarize the data for varying analyses. Furthermore, I work with partners in over 25 cities to answer any database or analysis questions they may have.
- 2015 – 2017 **Ecological Analyst**, *Urban Wildlife Institute*, Lincoln Park Zoo, Chicago, IL.  
Developed techniques to better manage and analyze ecological data and assisted other science centers across the Lincoln Park Zoo with statistical analyses, data management, and computer programming. I also developed statistics and computer programming workshops for staff. Finally, I helped initiate a large-scale citizen science project, Chicago Wildlife Watch ([www.chicagowildlifewatch.org](http://www.chicagowildlifewatch.org)) and have written extensive software to verify and upload data to the project.
- 2012 – 2015 **Coordinator of Wildlife Management**, *Urban Wildlife Institute*, Lincoln Park Zoo, Chicago, IL.  
Led research of wildlife on zoo grounds, which included daily avian point counts, tracking relocated turtles in a newly restored pond habitat, on grounds rabbit management, arthropod surveys, and monitoring a nesting colony of state-endangered Black-crowned Night Herons (*Nycticorax nycticorax*). To do all of this work, I managed and trained teams of interns each year, mentored them on urban ecology, and helped them present their work to their peers at the Lincoln Park Zoo. Additionally, I collaborated extensively with the Lincoln Park Zoo's education department on numerous projects to educate zoo visitors on wildlife conservation efforts throughout Chicago.
- 2011 – 2012 **Research Intern**, *Urban Wildlife Institute*, Lincoln Park Zoo, Chicago, IL.  
Aided with field work and data entry for the Urban Wildlife Institute's biodiversity monitoring project, helped with research on zoo grounds, and created year-end permit reports.
- 2009 – 2010 **Environmental Technician**, *Environmental Assessment Services*, Richland, WA.  
Assisted with numerous biological research projects at the Hanford superfund site.

## Publications

\* denotes shared first authorship , † denotes undergraduate intern

### In preperation

Bates, J. M., **Fidino, M.**, Nowak-Boyd, L., Strausberger, B. M., Schmidt, K. A., and Whelan, C. (*in prep*). Climate change affects bird nesting phenology: comparing contemporary field and historical museum nesting records.

**Fidino, M.** (*in prep*). An integrated model to predict hotspots of human-wildlife conflict.

Murray\*, M. and **Fidino\*, M.** (*in prep*). Estimating spatiotemporal correlates of sarcoptic mange in coyote by intergrating data from motion-triggered camera images into a dynamic occupancy model.

### In review or revision

**Fidino, M.**, Barnas†, G., Lehrer, E. W., Murray, M., and Magle, S. B. (*in review*). The influence of lure on detecting mammals with camera traps. *Wildlife Society Bulletin*.

**Fidino, M.**, Bender†, J., Limbrick†, K., Gallo, T., and Magle, S. B. (*in revision*). Strolling through a century: recreating historical bird surveys to explore 100 years of change in an urban bird community. *The American Naturalist*.

### Published

**Fidino, M.**, Simonis, J. L., and Magle, S. B. (2019). A multi-state dynamic occupancy model to estimate local colonization-extinction rates and patterns of co-occurrence between two or more interacting species. *Methods in Ecology and Evolution*, 10(2):233–244.

## Selected Scientific Presentations

- 2019 A city’s size and proportion of green space affects mammalian relative occupancy and response to urbanization: an analysis of 10 cities across the United States. The International Urban Wildlife Conference. Portland, Oregon.
- 2018 Advancing urban wildlife knowledge through a multi-city collaboration. The Wildlife Society. Cincinnati, Ohio.
- Long-term declines of a highly interactive species. Society for Conservation Biology. Toronto, Ontario.
  - Long-term declines of a highly interactive species. International Association for Landscape Ecology. Chicago, Illinois.
- 2017 Using Fourier series to predict periodic patterns in dynamic occupancy models. Ecological Society of America. Portland, Oregon.
- Quantifying the structural and functional connectivity of habitat patches for Chicago area mesocarnivores. International Urban Wildlife Conference. San Diego, California.
- 2016 A Bayesian approach to incorporate patterns of co-occurrence into multi-species occupancy models. Society for Conservation Biology. Madison, Wisconsin.
- 2015 Mesocarnivore dynamics in a highly fragmented, yet highly permeable urban landscape. Ecological Society of America. Baltimore, Maryland.
- 2014 Habitat dynamics of the Virginia opossum (*Didelphis virginiana*) in a highly urban landscape. The Wildlife Society. Pittsburgh, Pennsylvania.

---

## Selected Invited Presentations

- 2019 **Plenary:** Harnessing UWIN data to reshape the future of cities. The Urban Wildlife Information Network summit. Chicago, Illinois.
- **Lecture:** A city's size and proportion of green space affects mammalian relative occupancy and response to urbanization. Texas Tech University. Lubbock, Texas.
  - **Seminar series:** Camera trapping across North America. The Fort Dearborn Audubon Society. Chicago, Illinois.
- 2018 **Lecture:** Advancing urban wildlife knowledge through a multi-city collaboration. International workshop on biodiversity and the urban-rural interface. Linde, Germany.
- **Seminar series:** Urban wildlife through space and time. Seminar series at Butler University. Indianapolis, Indiana.
- 2016 **Seminar series:** A historical analysis of bird species diversity in Lincoln Park, Chicago during spring migration. The Fort Dearborn Audubon Society. Chicago, Illinois.

---

## Grants and Awards

- 2020 – 2022 **NSF** – Impacts of Urban Rats and Rodent Control on Public Health and Urban Wildlife Conservation (Senior Personnel, \$680,466).
- 2018 – 2020 **Grainger Foundation** – Urban Wildlife Information Network expansion (Co-PI, \$250,000).
- 2014 – 2020 **Abra Prentice Wilkins Foundation** – Urban Wildlife Institute Expansion (Co-PI, \$1,500,000).
- 2014 **The American Bluebird Society** – Assessing the nest success of urban cavity nesting birds (Co-PI, \$600).

---

## Teaching Experience

- 2016 – Present **R programming and occupancy modeling:** Developed a two-day workshop to teach students, faculty and new partners to the Urban Wildlife Information Network the basics of R programming and how to model detection/non-detection data collected via camera trapping.
- 2019 **Occupancy modeling and data management:** Gave a short course on the basic assumptions of occupancy modeling and camera trapping data management to 40 researchers at the Urban Wildlife Information Network summit held at the Lincoln Park Zoo.
- 2018 **Occupancy modeling in R:** Taught R programming and occupancy modeling to students and faculty at Butler University in Indianapolis, Indiana.
- 2017 **Software Carpentry course on R programming:** Assisted with course held at University of Illinois at Chicago.
- 2016 **Workshop on generalized linear models, power analysis, and simulations in R:** Developed workshop to teach Lincoln Park Zoo staff on basics of generalized linear models and how to simulate data in R.
- 2014 **A review of bird count methods and analyses.** A workshop I developed and presented to the Chicago Audubon Society

## Reviewer

Biological Conservation, Canadian Journal of Zoology, Ecography, Ecology and Evolution, Ecological Applications, Ecology Letters, Environmental Conservation, Human Dimensions of Wildlife, Journal of Fish and Wildlife Management, Journal of Mammalogy, Urban Ecosystems, The Wildlife Society Bulletin

---

## Service and Outreach

**External PhD committee member** for Anna Kase at University of South Dakota. Thesis topic: False map turtle (*Graptemys pseudogeographica*) abundance and habitat utilization in the Missouri River, South Dakota.

**Research committee member** at the Lincoln Park Zoo, which is tasked to evaluate research proposals from external and internal researchers who wish to conduct research on zoo grounds, with zoo data, or with zoo resources.

**Accessibility working group member** at the Lincoln Park Zoo, which is tasked to make programs at the zoo more accessible for people with disabilities.

**Moderator on Chicago Wildlife Watch**, which is a citizen science project for people to help classify the camera trap images we collect throughout Chicago.

**Consultant for Manual Cinema piece 'Chicagoland'**. Manual Cinema is an Emmy Award winning performance collective based in Chicago. They developed 'Chicagoland', a shadow-puppet piece about coyotes in Chicago, and interviewed myself and Dr. Seth Magle about urban ecology. The performance piece and interview can be watched at [www.chicagolandfilm.net](http://www.chicagolandfilm.net).
